Masking Tape

Made of easy to tear paper backed with relatively weak adhesive.

Features: Good adhesion to metal, glass, plastic and rubber, Quick Stick, Easy to peel.

Main Usage: Indoor paint masking, light binding, holding, splicing, tabbing.

Categories: Automotive grade, General grade

BOPP Tape

Bi axially oriented polypropylene film backing and pressure sensitive acrylic adhesive.

Features: High tensile strength and broad temperature tolerance.

Main Usage: Packing, Sealing, Protection

Categories: 40 MIC TO 50 MIC,
Color Variants

PVC

Soft PVC backing with rubber based pressure sensitive adhesive.

Features: Excellent Insulation, Good flame retardant properties.

Main Usage: Protect underground pipe from corrosion, A/C pipe wrapping

Categories: Available in Black/White color, different thickness

Aluminum Tape (Plain, FSK & ALU GLASS)

Single sided tape, aluminum foil backing with synthetic rubber or solvent acrylic glue.

Features: The main advantages of foil tapes are, is easy to tear, protects against UV degradation and high temperature, excellent resistant to flame, dust, moisture and chemicals, With good resistance to smoke, water, vapor and other HVAC duct contaminants

Main Usage: Sealing fiber glass, Duct boards, Sheet metal ducts, A/C ducts.

Categories: Plain, FSK, ALU GLASS

Fibro Tape/ Dry Wall Joint Tape

Fiber glass reinforced backing, very high tensile strength and not easy to brake.

Features: Made of fiber glass & 100% self-sticking tape.

Main Usage: Fast & easy drywall joints.

Categories: Available in different length.

PE Protection tape

UV protected Polyethylene film is coated with acrylic adhesive to give excellent protection both indoor, outdoor and during transit

Features: Specially designed acrylic adhesive adheres well to almost all surfaces but does not leave any residue when removed after protection film has been used

Main Usage: Application on Polycarbonate sheets, Protection on Aluminum Panel and composite panels, Carpet protection, Protection on MICA, Protection on Aluminum Embossed surfaces, and Protection on powder coated surfaces Panel

Categories: Black, White& Black

Duct Tape/ Cloth Tape

Textile fiber cloth backing & coated with pressure sensitive adhesive

Features: Strong adhesive, high tensile strength protects surface from rust, humidity, water and easy tear.

Main Usage: Heavy packing, Pipe wrapping, Carpet joints.

Categories: Color variants, Available in 27, 35, 45, 50 Mesh

Pet Tape

PET Film coated with solvent acrylic adhesive

Features: Excellent adhesion under both high and low temperature, high bonding energy to non-polarity materials.

Main Usage: Graphic arts, photography, metal finishing and electronic industries

Categories : Available in different sizes, red color

Foam Tape

PE, EVA, PU, PVC, NBR backing with acrylic solvent or synthetic rubber adhesive

Features: Dust proof & weather proof seal. The adhesive foam tape is very versatile and suitable for a wide array of bonding surfaces.

Main Usage: General mounting of mirror glass and splicing application, Automotive, Used around doors and windows, Industrial Application), it can be used on steel, nylon, glass, rubber, acrylics, ABS, aluminum, vinyl etc

Categories: Single sided, Double Sided, Different Thickness 1mm-6mm

Warning Tape

These tapes are without adhesive

Features: Very easy to be found.

Main Usage: Used mainly in construction sites or on roads for traffic

Categories: Usually in red and white color

Bubble Roll

Features: Reduces the damages of delicate items, Protects the glass surface, Acts as room insulation, Wraps portable gadgets and equipment, Protects storage items.

Main Usage: Common type of bubble wrap found in stores; used to pack light to medium weight items.

Double Sided Tissue Tape

Tissue paper backing with synthetic rubber adhesive.

Features: Designed to stick two surfaces together in a way that isn't visible on the end product, quick to stick with a good temperature range

Main Usage: Mounting nameplates, core start-up, laminating to cork, cloth or felt, and splicing papers, textiles or plastics. Hand tearable.

Categories: Water based, solvent based

Stretch film

Features: It is a highly stretchable plastic film that tightly hold the objects to provide a secure overwrap during transportation, Low supply cost, transportation saving, Minimizes transportation & warehouse damages

Main Usage: It is frequently used to utilize pallets loads, also used for bundling small objects
